

A bar chart comparing the performance of three algorithms: Greedy (blue), RKGA (pink), and PF (green). The x-axis represents the number of times a region is observed (0 to 5), and the y-axis represents the percentage of area (% of Area) from 0 to 60. The chart shows that RKGA and PF perform best at 1 observation, while Greedy performs best at 3 and 4 observations.

Times a Region is Observed	Greedy (%)	RKGA (%)	PF (%)
0	0	0	2
1	2	61	61
2	15	38	29
3	37	1	8
4	28	0	0
5	12	0	0
